

I have to begin the report for my stay in Czech Republic with my whole impression of the country. That was my first time visiting this state, but I have an idea for the rich history and cultural legacy of this old European country. The small town, where we have spend most of our time, has offered us an excellent example for the atmosphere and the way of life in a typical Czech society. I can definitely say that the chance to spend a week in the academic environment whit all the others young, smart and creative people was one of the most useful during my whole education.

I rest contented with the organization of our stay. I have met very interesting young people, whose professional interests are basically the same as my own. I am happy that I can call them my friends and I am very glad that we have spent this week together. We all have enjoyed the specially organized cultural evenings, excursions and visits to geographical and historical sites. We also had the opportunity to visit a Czech language course and become the basic knowledge in this area. For my personal experience as very valuable I can determine the visit at “Bosh” and other popular firms, where we have seen the main process of elaboration, production and managing of the output. I have become some very important knowledge and I hope that some day I will have the possibility to use them in my own professional life.

In conclusion I can generalize that my stay in Czech Republic was reasonable, interesting and useful. The contact with entirely different political, social and educational system, the improvement of language knowledge and the communication with new interesting people are for sure extremely useful for everyone. The new experience in the concrete subject of learning and the opportunity for analysis and comparing the situation in Bulgaria and in the other European country are sufficient motive for every student to educate abroad.
